Commonwealth of Massachusetts.

INSURANCE DEPARTMENT, BOSTON, May 28, 1895.

To the Honorable the Senate and House of Representatives.

Herewith, in compliance with the provisions of law, is submitted Part II. of the fortieth annual report of this department, relating to life and casualty insurance, and containing also abstracts of the reports of the assessment and fraternal corporations.

As in the case of the fire report, the extraordinary work placed upon the department during the year, and the natural increase of the business without a comparative enlargement of clerical assistance, have delayed the publication of this report fully four weeks beyond the usual period.

The following shows the changes in the list of companies transacting business in the Commonwealth during the year:—

ADMITTED.

Guarantors Liability and Indemnity Company of Philadelphia, May 24, 1894; Prudential Insurance Company of America of Newark, N. J., May 31; City Trust, Safe Deposit and Security Company of Philadelphia, June 12; Kansas Mutual Life Association of Topeka, Kan., July 9; Phænix Mutual Life of Hartford, Conn., September 17.

WITHDRAWN.

Massachusetts Hospital Life (see last year's report), February 10; American Employers' Liability of Newark, N. J., authority suspended March 26.

The statistical tables present in detail the operations of the several companies during the year; and, in view of the enforced

lateness of the presentation of this report, the commissioner will attempt no analysis of the figures therein presented.

PROTECTION PRINCIPLE IN CASES OF LAPSE.

Under the provisions of the Massachusetts statute, first adopted as a principle of law by this Commonwealth, the holder of a policy, in case of lapse after two annual payments have been made, is absolutely protected as to his rights in the reserve belonging to such policy. This legal provision attaches only to policies of Massachusetts companies. Nearly all the companies of other States have voluntarily attached to their policies a modified provision of this character, attaching after three annual payments have been made.

With considerable uniformity, however, the holder of a policy in such case, in companies other than those of Massachusetts, must notify the company within a limited period after lapse of any payment, and surrender the policy, in order to secure any advantages arising from his contributed reserve. question of a change in this direction was before the Legislature during the session of this year, but was somewhat confused with other propositions, and no action was had. commissioner very strongly urges the introduction of a provision of law which shall apply to all companies, making, in case of lapse after two or three annual payments, the feature of extended insurance or a paid-up policy automatic. holder of such policy has confessedly contributed a certain amount of his premiums to the reserve. This belongs absolutely and unqualifiedly to such policy-holder, and his right to a use of the same in some form ought not to be permitted for one moment to depend upon any action or notification on Practically, the provisions of the Massachusetts law - the question of dependence upon two or three annual premiums being a matter of opinion — ought to be made by the provisions of statute applicable to every policy issued to a citizen of this Commonwealth. Some self-acting principle in regard to the reserve ought to be enforced upon every company. If beyond this such corporations see fit to give to the policyholder certain options dependent on his own selection, well and good. But the absolute confiscation of the reserve belonging to any policy, unless the holder thereof in case of lapse is

sufficiently well informed to notify the company within the period designated by the company, ought not to be for one moment longer permitted.

FORM OF ANNUAL STATEMENTS.

For many years, particularly through the consultations of the various commissioners and superintendents in the annual convention, strenuous efforts have been made to secure the adoption of a uniform blank form for the annual statements of the life insurance companies to the several departments. Very great progress has been made in this direction, and the success therein alone fully justifies the existence of such convention. But the statutes of the various States differ somewhat in the requirements of the commissioners in relation to the treatment in annual reports of such statements from the companies. During the past year the question has been seriously raised as to the form of the commissioner's annual report, and in one instance the argument earnestly presented that these statements from the companies should be published in the precise form rendered to the different departments. Massachusetts has very little patience with a proposition of this character. The various companies have different forms and methods of book-keeping, which undoubtedly, even in their varied multiplicity, sufficiently serve the purposes of the officers of the companies in carrying on their transactions. No two of them present their finances in precisely the same form and manner. The only possible good purpose of the publication by this department of an annual report, giving the standing and condition of the various companies, is to afford to the insuring public, the great majority of whom are not versed in the intricacies or peculiar methods of book-keeping, a plain, understandable presentation of the condition of the various companies; to simply present what any or every one of these corporations sees fit to make up, would rob the annual reports absolutely and entirely of their value to the public. The laws of Massachusetts require the commissioner to elicit from the companies such information as he deems desirable to a clear understanding of their finances and condition, and the statute provides further that from such presentation by the companies he shall "compute," and in a large degree, in

accordance with specified provisions of law, the net value of the policies, determine the liability upon the contracts and make "an exhibit of the financial condition and business transactions of the several companies as disclosed by the examinations of the same or by their annual statements," "presenting abstracts of such statements." No more foolish expenditure of money of the Commonwealth could well be conceived than in the publication of reports made up thus upon a varying basis, if the commissioner were simply to present them as they are offered to him from the company, and not to scrutinize, analyze, and therefrom to "compute," the actual standing and condition of the company.

MARKING UP REAL ESTATE VALUES THROUGH INCOME.

Allusion was made in the last annual report to the lack of uniformity on the part of the companies in making return of the values, in ledger assets, of the property and securities originally purchased or which had come into possession through foreclosure.

The blank statement form calls for "cost value," which is understood to mean the original purchase price or sum actually paid in acquisition of the property. This "cost value" of individual parcels of real estate would properly be increased by any amounts of cash actually invested in permanent additions and improvements made subsequent to the original purchase, just as additional purchases of bonds and stocks would go to the increase in "cost value" of these items. In no other way can the "cost value" of these items be properly increased. It would not include ordinary repairs or care of the property, as these could belong only in the expense and not in the investment account.

But in several instances this view of the "cost values" has not been taken as the intent of the term, and there has been a marking up without any corresponding output of cash in increase of the holdings either for additions or permanent improvements, but simply as estimated appreciation of former values. In order to do this and make the accounts tally and balance, it is found necessary to run these added amounts through income, but without the slightest claim that it represents the incoming of money to the company's till,—as if the

income account had not been sufficiently imposed upon and stultified by making it an omnibus for masses of hypothetical new "cash" premiums in the shape of "dividends declared and applied to payment for reversionary additions," "lapsed reserves used to purchase paid-up insurance," etc.; in each case the money simply taken from one pocket (in the mind of the book-keeper) and put into the other, without the least pretence of an outgo or income as between the money drawer and the outside of the office.

The two performances, of marking up estimated values of real estate through income and swapping dividends into "cash" premium receipts, are alike in theory and differ only in degree of absurdity, the latter having as its basis a certain fictitious series of book balances, while the former is pure moonshine out of the head of the speculator. Neither can have any proper place whatever in a statement of money transactions, such as the income account of a life company is intended to be.

No one seeks to deny to the companies full credit for any dollar of actual appreciation in value of their property, and there is a place specially provided for its clear and prominent exhibit,—but not in income. The departments have generally ruled very liberally in this respect, allowing values of such property at the companies' own estimates, except in very rare cases, when the claimed values were palpably excessive.

Nor, as frequently said heretofore, does the commissioner desire or intend to teach a company how it shall keep its books for its own office purposes; but he does desire that the statement made to this department shall be in such form as to be understood by ordinary book-keeping intelligence, and in conformity with the uniform blank provided for that purpose.

Uncollected and Deferred Premiums.

No little misunderstanding and consequent confusion have lately arisen in respect to these items and their proper force and effect in the financial statement, through the promulgation of a new theory and device for their treatment. For nearly a score of years the practice was accepted and settled, so far as the returns to the insurance departments are concerned, of deducting from these items all loadings beyond the net pre-

accordance with specified provisions of law, the net value of the policies, determine the liability upon the contracts and make "an exhibit of the financial condition and business transactions of the several companies as disclosed by the examinations of the same or by their annual statements," "presenting abstracts of such statements." No more foolish expenditure of money of the Commonwealth could well be conceived than in the publication of reports made up thus upon a varying basis, if the commissioner were simply to present them as they are offered to him from the company, and not to scrutinize, analyze, and therefrom to "compute," the actual standing and condition of the company.

The blank statement form calls for "cost value," which is understood to mean the original purchase price or sum actually paid in acquisition of the property. This "cost value" of individual parcels of real estate would properly be increased by any amounts of cash actually invested in permanent additions and improvements made subsequent to the original purchase, just as additional purchases of bonds and stocks would go to the increase in "cost value" of these items. In no other way can the "cost value" of these items be properly increased. It would not include ordinary repairs or care of the property, as these could belong only in the expense and not in the investment account.

But in several instances this view of the "cost values" has not been taken as the intent of the term, and there has been a marking up without any corresponding output of cash in increase of the holdings either for additions or permanent improvements, but simply as estimated appreciation of former values. In order to do this and make the accounts tally and balance, it is found necessary to run these added amounts through income, but without the slightest claim that it represents the incoming of money to the company's till, —as if the

income account had not been sufficiently imposed upon and stultified by making it an omnibus for masses of hypothetical new "cash" premiums in the shape of "dividends declared and applied to payment for reversionary additions," "lapsed reserves used to purchase paid-up insurance," etc.; in each case the money simply taken from one pocket (in the mind of the book-keeper) and put into the other, without the least pretence of an outgo or income as between the money drawer and the outside of the office.

The two performances, of marking up estimated values of real estate through income and swapping dividends into "cash" premium receipts, are alike in theory and differ only in degree of absurdity, the latter having as its basis a certain fictitious series of book balances, while the former is pure moonshine out of the head of the speculator. Neither can have any proper place whatever in a statement of money transactions, such as the income account of a life company is intended to be.

No one seeks to deny to the companies full credit for any dollar of actual appreciation in value of their property, and there is a place specially provided for its clear and prominent exhibit,—but not in income. The departments have generally ruled very liberally in this respect, allowing values of such property at the companies' own estimates, except in very rare cases, when the claimed values were palpably excessive.

Nor, as frequently said heretofore, does the commissioner desire or intend to teach a company how it shall keep its books for its own office purposes; but he does desire that the statement made to this department shall be in such form as to be understood by ordinary book-keeping intelligence, and in conformity with the uniform blank provided for that purpose.

Uncollected and Deferred Premiums.

No little misunderstanding and consequent confusion have lately arisen in respect to these items and their proper force and effect in the financial statement, through the promulgation of a new theory and device for their treatment. For nearly a score of years the practice was accepted and settled, so far as the returns to the insurance departments are concerned, of deducting from these items all loadings beyond the net pre-

miums called for by the State standard for computation of net values. And in this connection the following quotation from the thirteenth annual report of this department, made in 1868 by Commissioner John E. Sanford, is of much interest and value for its clear and logical statement of the conditions:—

Here is a simple question of book-keeping. We assume that the companies return, as the form of statement permits, only those unpaid premiums on policies reported as still in force, which fell due during the year ending on the day (December 31) which is the date of the valuation. We assume, for the same reason, that "deferred premiums" include only the balances of annual premiums on policies in force, the first instalment of which fell due during the year aforesaid; and that, in either case, these premiums or balances, not having been collected or received by the company, do not appear elsewhere among its assets.

To decide whether such unpaid and deferred premiums are to be credited among the assets, we have only to look at the other side of the account, and see what we have charged among the liabilities. Now, in making the valuation of policies, we compute the premium reserve on all the policies to which these premiums attach (because they are "in force"), and, in so doing, we assume that these premiums have all been actually paid, and charge the company with them as actually received, at the beginning of the policy year, —that is, at some time prior to the date of the valuation. Having thus, by the valuation, made the companies realize these premiums, whether they would or not, and having worked them into the sum total of the reserve, it would be hard to say that they should not count somewhere as assets of the very fairest character as against the reserve. As a plain question of balancing accounts, we must either reduce the reserve or allow the premiums. It is just as well, and a good deal more convenient, to do the latter. It will not do to say that the premiums may in fact be unpaid, because that involves, in most cases, the forfeiture of the policy, which would reduce the reserve in still larger measure.

This unpaid premium, considered by itself, has no claim whatever to be regarded as an asset at all. It cannot be negotiated or used for the purchase of anything, nor in the payment of expenses or claims; and, except in the bare case of the policy maturing, when the outstanding or deferred premium would go by so much to reduce the amount of the insurance, it is of no money value to the company whatever.

The unpaid premium due for the current year is no more secure to the company than is that for the next or any or every subsequent year within the term for which the policy was written. It is something in the air, and may or may not become part of the actual and realized assets of the company. But, considered in connection with the facts upon which the statement is made up, it becomes an entirely legitimate and proper item, — that is, as an offset only, to the overcharge that has been made in computing the reserve liability on its account. In this view and in this only is there any justification whatever in carrying any portion of these outstanding premiums as admitted assets. The company has been overcharged in the computation of the reserve, upon the assumption that the full yearly premium had been paid and received in advance. If this is not true, and any portion of the premium remained unpaid at date of valuation, the company is clearly entitled to have the net portion deducted from the reserve or to a credit in assets equal to the overcharge; and, as the valuation is made on the net premium basis, the credit should be for that portion, and that only, of the net premium then remaining unpaid.

To arrive at a strictly accurate result, leaving off the loading of the gross premiums would perhaps involve an amount of detail and labor out of proportion to its average importance and seem a refinement; and in this view, at the time of preparation of the convention blank form adopted in 1875 and since in use, a careful estimate was made by several of the actuaries and book-keepers as to the probable average percentage of margin that should be deducted in order to reduce these premiums to net rates and save if possible the labor of the more minute calculation. It was concluded that, taking as the basis what were then known as the "agreed rates," a deduction of 20 per cent. from the sum of these uncollected and deferred amounts would leave a fair and reasonable approximation to the net premiums. For other cases, where the gross premiums varied considerably from the usual rates, there would need to be special estimates made; but the understanding and intention were wholly and only that all these premiums were to be reduced to net rates before being entered in the statements as assets.

Latterly, however, this view has been entirely lost sight of or ignored, and these premiums are made to bear a new, illogical, inapt and entirely undeserved burden; and, instead of the office for which they are alone fitted and intended,—that of a cross entry to correct an overcharge,—they are sought to be made the measure and means of meeting some hypothetical future expenses. This should not be permitted. The net portion of these premiums is appropriated to a particular and important purpose, and cannot be removed from it without absurdly stultifying the statement. The loading, which has been thrown out of the accounts, is free to be treated by any theory which may be pleasing to visionaries, and will be harmless as long as kept out of the accounts. If the company has entered into an obligation in respect to these premiums that is to be fulfilled after they are collected, let such obligation (if in excess of the loading) appear in liabilities, where it belongs; or, if it is considered essential that it be used to reduce the assets, let it be deducted from cash or some other item, where it would be as appropriate and less harmful and disturbing than if taken from the net uncollected and deferred premiums, - which, so long as unpaid, are a bookkeeper's fiction only, and when collected must go intact into the reserve, and can by no theory go to expenses or any other purpose whatever than protecting the insurance proper.

This view of the function of the uncollected and deferred premiums as related to the assets and liabilities of the companies has been held in this department from the days when the statements of the life companies first began to receive systematic and intelligent audit by State authority; and the commissioner sees no present reason for a change of practice in respect to it, especially as the different treatment suggested partakes of the principles and essence of the gross valuation theory, which receives no sanction in the laws of this or any other State wherein supervision and audit of the accounts of insurance companies are recognized or required.

THE QUESTION OF RESERVE BASIS.

The somewhat reduced rate of interest during the past few years has naturally called attention to the basis of the reserve calculations for life insurance companies. While it is true

that the assets are not to-day earning so large an amount as in the past, the net results, even taking into the calculation a proportion of the office expenditures of the companies as fairly chargeable to the care of the assets, have not fallen to the legal reserve basis. That there has been a general decline of interest rates in this country for the last twenty-five years is evident and conceded, but that this decline is now or prospectively going on at a pace that must in any future, within the range of reasonable apprehension, bring the improvement of money in this country to a rate inconsistent with the present general standard in use by the States as a measure of the ability of the companies to surely meet their present or coming obligations, no adequate or sensible reason whatever is given. Even the single company which more than a dozen years since advocated and adopted for its own business the three per cent. rate, presents to the public an amount of interest earnings upon its funds nearly double what that rate would produce. A portion of this is, to be sure, upon its surplus funds, but probably the company would not be willing to admit that its surplus within that period has decreased or in any probable contingency is likely to do so hereafter. If it is urged that rates may possibly in future dwindle to three per cent., so also it may be claimed that they may possibly vanish altogether; and so it might be urged that it would be prudent to disregard any rate of interest, and base the premiums on such a theory as would not require any gain whatever from that source, and the provision for future obligations be based on gold, which should at once be locked up in the deep treasuries of Moukden and guarded by dragons. The history of finance, not only in this but in European countries, shows for a long period of years an alternating scale in the interest rate; and an examination of the figures extending over a century affords no fair indication that the pendulum has not swung pretty nearly to the verge, and likely to move in the opposite direction. Thus far the American companies have had a substantial margin, alike in mortality and interest; and there appears to the commissioner to be no immediate necessity for a radical change. True, the tendency on the part of the companies is quite generally in the direction of a possible lower rate of interest, and some of the larger companies have already conformed a portion of their plans upon

the basis of a more conservative interest rate than the standard this Commonwealth now calls for. There is a universal feeling that life insurance costs are too heavy, and result in large degree from the enormous expenses of conducting the business. While this is regretted by every one, and in no instance more than by the officers of the companies, thus far the best ingenuity has not suggested a practical remedy. While the companies are realizing from their invested funds an average amount of interest equal to more than five per cent. upon the reserves, and the rate has not sensibly, certainly not essentially, diminished for several years, there does not seem any adequate reason for going to a rate that shall have the effect to enormously increase the labor and risk of caring for a great additional fund. Nor, if, as appears, there is no apparent reason for piling up the additional funds, is it easy to reconcile such a demand with the earnest general protest of a year or two ago that the rapid increase of these funds should be restricted by law as a needless and dangerous menace to the financial and public safety.

The question of interest rates in life insurance values and the consequences of raising or lowering them is wholly one of production. For instance, if one should desire to make an investment that would produce \$1,000 of interest per year, if the investment could be made in securities that bear five per cent. interest, the investment would need to be \$20,000; if, however, it was found that such securities only could be had as were bearing four per cent., \$25,000 must be invested; if only three per cent., then \$33,333 $\frac{1}{3}$ would be needed. And when it is understood that this in principle is the effect that would be had of applying a change of rates to premiums and reserves in life insurance matters, it is easy to see the tremendous results of such a change. There are, in round figures, say \$1,000,-000,000 of reserves held by the American life companies at this time; and if the change from present four per cent. to three per cent. were to be at once applied to them, it would necessitate the increase of this sum by more than a hundred million dollars.

It is not, however, expected to apply this change to the reserves accrued from past transactions, but only to future contracts. The results would be the same in principle, and

require the increase of premiums and reserves from 12 to 18 per cent. over present rates. And this enormous increase upon a business sufficiently burdened with expense cannot be justified except by palpable and tangible causes, - simple theories and speculations are insufficient. If, however, the present interest conditions must be accepted as final, and it becomes evident that stronger reserves must be maintained to meet the weakening tendency of interest rates, there seems to be no refuge but in adopting higher rates of premiums through a lower rate of interest. The agitation of the subject of rates of interest has been going on more or less earnestly for many years; but the commissioner sees no reason to change his heretofore position that action in this matter should not be asked of the Legislature until the companies themselves are convinced of its necessity; that, as they are certainly as well informed on the subject as the average legislator or the com-missioner, and quite as deeply interested, the initiative should come from them. Until the companies are ready to co-operate earnestly, the question would be very pertinent, "Why should the Legislature require the companies to charge the people higher rates of premium than they are willing to sell their goods for?" Whenever the companies, and especially our Massachusetts companies, generally agree that the time has come for the change will be soon enough, even if not necessary for years, to ask for legislative interference.

Should it in the future be found necessary to raise the standard of the reserve, it might be desirable, while placing all new business after a given date upon, say, a 3 per cent. basis, to then require the old business of the companies to be brought up to that standard by tenths of a per cent. annually; that is to say, in the year upon which a 3 per cent. basis should be established for new business, the old business to be increased to 3.90 per cent., the following year to be brought up to 3.80 per cent., and thus in a period of ten years the entire business, without violation to the methods of finances of the companies, could be established upon a higher reserve. In truth, the amount of the old business which would terminate during each one of the ten years of such a period would pretty nearly, if not altogether and absolutely, take care of the annual one-tenth per cent. increase in the reserve. Or, if desirable to

avoid a reconstruction of tables, the same result might practically be reached by adding to the total reserve, 1 per cent. or less per year; not, however, to exceed a 3 per cent. valuation on the entire business.

The statute requires that suggestions of the commissioner as to legislation be made to the General Court prior to its session in January, instead of being included in the annual reports. The recommendations of the commissioner for the current year will be found in the Appendix to this volume.

As the Legislature during 1894 enacted a codification of the insurance statute so near the close of the session as to include all changes made during that year, and the present session being now at an end, all insurance legislation will be at once published by the department in pamphlet form. Therefore none of the laws affecting life insurance are included in this volume.

During the year the affairs of the Home Relief Association and the Pioneer Life and Casualty Company, in which in 1891 Homer Albers, Esq., was receiver, have been closed.

THE LONG-ENDURING ENDOWMENTS.

The following summary shows briefly the progress made by the receivers since the publication of the last report in winding up the affairs of the assessment endowment corporations:—

Finally Settled.

Order of the Iron Hall.—Robert A. Knight, receiver, Springfield; appointed November, 1892. By decree of Supreme Judicial Court, May 12, 1894, the receiver was directed to turn over all assets of the corporation in his hands to James F. Failey, receiver-general of the corporation at Indianapolis, Ind. Receiver Knight filed with Receiver Failey proofs of claims of 8,180 members. Receiver Failey acknowledges receipt from Receiver Knight of \$253,214.24. Total receipts by Receiver Knight, \$287,093.53. The Massachusetts receivership has been practically closed.

ABRAHAM LINCOLN BENEFIT Association. — Thomas Milligan, receiver, 38 School Street, Boston; appointed July, 1893. Under decree of the court a dividend of 76 per cent. was paid

in April, 1895, practically closing the affairs of the corporation.

ROYAL ASSURANCE LEAGUE. — William A. Morse, 79 Equitable Building, Boston, and Sherman L. Whipple, 5 Tremont Street, Boston, receivers; appointed by Insolvency Court, February, 1892. Dividend of 15 per cent. was paid in July, 1894, and the affairs of the corporation are practically closed.

Mystic Seven. — David E. Gould, receiver, 53 State Street, Boston; appointed November, 1891. Dividend of 10 per cent. was paid in May, 1894, and this practically closed the affairs of the corporation.

United States Two-Year Benefit Order. — Joseph Bennett, receiver, 61 Court Street, Boston; appointed July, 1892. Dividend of 53 per cent. was paid in May, 1894, and the affairs of the corporation practically closed.

Order of Equity.— N. Sumner Myrick, receiver, 92 State Street, Boston; appointed July, 1893. Receiver has paid dividend of 48 per cent., and the affairs of the corporation are closed.

Non-secret Endowment Order. — Willis E. Sibley, receiver, 405 Main Street, Worcester; appointed February, 1893. Dividend of $76\frac{2}{3}$ per cent. paid in July, 1894. Affairs of the corporation closed.

Catholic Crusaders of the Holy Cross.—John A. Noonan, receiver, 61 Court Street, Boston; appointed August, 1893. A dividend of 24 per cent. was paid April 26, 1894, and the affairs of the corporation pratically closed.

KNIGHTS AND LADIES OF PROTECTION. — Charles F. Kitridge, receiver, 27 School Street, Boston; appointed February, 1892. A dividend of 86.91 per cent. has been paid, and the affairs of the corporation practically closed.

People's Favorite Order. — Thomas J. Barry, receiver, 48 Congress Street, Boston; appointed March, 1892. A divi-

dend of 51 per cent. was paid in October, 1894, which practically closes the affairs of the corporation.

Pending Settlement.

MUTUAL ONE-YEAR BENEFIT ORDER.—Sherman L. Whipple, receiver, 5 Tremont Street, Boston; appointed February, 1892. In addition to a dividend of 33 per cent., paid in January, 1894, receiver expects at an early day, awaiting settlement of claim, to declare a second and final dividend, which, however, will probably not be more than 3 per cent.

Industrial Order of America. — John P. Leahy, receiver, 31 Pemberton Square, Boston; appointed August, 1892. In addition to the dividend of 30 per cent. paid in September, 1893, the receiver has sufficient amount of funds to pay probably, as soon as an unsettled claim is determined, from 15 to 20 per cent. additional.

International Fraternal Alliance.—John P. Leahy, receiver, 31 Pemberton Square; appointed June, 1893. There will be a small additional dividend, which will shortly be declared.

ORDER OF THE WORLD. — John R. Baldwin, receiver, City Hall, Lynn; appointed December, 1892. There will be a dividend of 7½ per cent. in class 1 and 22 per cent. in class 2, which is now awaiting an order from the court, and will shortly be paid.

United Reserve Fund Associates.—J. F. Haskell, receiver, 33 Runels Building, Lowell; appointed May, 1893. Settlement awaits determination of suits against supreme officers. Nominal assets about \$94,000, which amount will undoubtedly be considerably decreased.

Sons and Daughters of America. — George T. Lincoln, receiver, 209 Washington Street, Boston; appointed December, 1893. Final dividend of 67 per cent. was paid during 1894. A small balance in the hands of receiver was ordered by the court to be retained two years, awaiting any possible claim.

ORDER OF THE RED CROSS. — Samuel K. Hamilton, receiver, 31 Milk Street, Boston; appointed June, 1893. Settlement of the affairs of the corporation are delayed, consequent upon the matter of the winding up of the Suffolk Trust Company. The dividend, if any, will be trifling.

Knights and Ladies of Columbia. — Chester A. Reed, receiver, 209 Washington Street, Boston; appointed September, 1892. Nothing remains to be concluded in regard to the affairs of this corporation except through the adjustment of suits still pending against officers thereof.

AMERICAN PROTECTIVE LEAGUE. — Henry W. Putnam, receiver, 85 Devonshire Street, Boston; appointed November, 1892. Receiver has paid dividend of 30 per cent., amounting to about \$90,000, and returned one assessment, amounting to about \$5,000. He has now about \$25,000, and will declare a final dividend as early as pending suits are finally adjusted and adjudication made of judgment of about \$1,700 against Rev. J. H. Gunning, one of the officers of the corporation.

Union Endowment. — Henry E. Turner, receiver, 186 Devonshire Street, Boston; appointed September, 1892. Settlement has been delayed by the inability to dispose of certain mortgages held by the corporation. Receiver expects soon to dispose of these. Fifty-five per cent. was paid in July last, and there will be a further dividend of about ten per cent.

Massachusetts Prudential Order. — John Haskell Butler, assignee, Globe Building, Boston. Affairs still waiting settlement. About \$500 in the hands of assignee.

Annual Friend.—John C. Burke, receiver, Lowell, Mass.; appointed March, 1892. Receiver has recovered judgments against the former officers to the amount of over \$48,000, but as yet has been able to collect but \$2,000 thereof. One suit is still pending, involving about \$1,000. The closing of the affairs of the corporation awaits this judicial determination.

Golden Grail. — Joseph I. Bennett, receiver, 61 Court Street, Boston; appointed September, 1891. A partial dividend of 11 per cent. was paid May 1, 1894. The receiver holds securities of doubtful value, upon which he hopes to realize sufficient to pay an additional small dividend.

FRIENDLY AID SOCIETY.—Henry A. Wyman, receiver, 914 Exchange Building, Boston; appointed September, 1891. Dividend of 7 per cent. was paid in August, 1893. Receiver, under order of the court, holds balance of \$12,500 until 1897, pending the expiration of a certain certificate of deposit. After that date a very small additional dividend will probably be paid.

Order of Ægis. — Alfred Hemenway, receiver, 5 Tremont Street, Boston; appointed October, 1892. First dividend was paid in April, 1894, being in full for general creditors, and 50 per cent. on claims in class 1, being the reserve fund, and 20 per cent. in class 2, being the death benefit fund. Receiver holds securities from which he expects to realize a sufficient sum to pay an additional and final dividend of from 10 to 14 per cent. in class 1.

Golden Lion. — George S. Hale, receiver, 10 Tremont Street, Boston; appointed December, 1891. Dividend of 100 per cent. was paid in October, 1893. Receiver has still in hand about \$50,000, and a suit is pending against the officers to recover for excessive salaries drawn. Later there will be an additional dividend.

Fraternal Associates of America. — Charles P. Gorely, receiver, 19 Milk Street, Boston; appointed November, 1892. Some progress has been made in the collection of the amount due upon a mortgage, but the affairs of the corporation are not yet closed.

Respectfully submitted,

GEORGE S. MERRILL,

Insurance Commissioner.

APPENDIX.

SUGGESTIONS FOR LEGISLATION.

Commonwealth of Massachusetts

INSURANCE DEPARTMENT, BOSTON, Jan. 1, 1895.

To the Honorable the Senate and House of Representatives in General Court assembled.

In accordance with the provisions of law, herewith is submitted such portions of the forthcoming report of the insurance commissioner as contain suggestions for legislative action.

Respectfully submitted,

GEO. S. MERRILL,

Insurance Commissioner.

In the revision of the insurance statute last year two typographical errors occurred which should be corrected. The word "fire" in the last paragraph of section 20 should be stricken out; and the word "issued" in the standard policy, following the restrictions as to camphine, benzine, naphtha, etc., should be changed to "used."

As policies written during the present year for the longest term allowed by law will not expire until the year 1900, the second "18" in the dates given in the standard policy should be stricken out and space left blank.

To harmonize the different provisions of the statute in regard to agents and brokers, the word "suitable" should be inserted in the second line of the second paragraph of section 93, between the words "any" and "person," or the additional provision made that the commissioner may refuse a broker's license to any person already convicted of violation of the insurance statutes.

The retirement from the department, to accept a much more lucrative position, of Deputy Commissioner W. S. Smith, who for nearly eighteen years had also filled the position of actuary, will necessitate the amending of the statute so as to provide for an actuary for this department.

By an error in the revision of the statute prescribing the printing of reports, the number of life reports of this department was accidentally reduced, and the law should be amended or additional provision made for one thousand more copies.

The insurance companies transacting business in Massachusetts pay, in accordance with law, precisely the same form and amount of taxes to the Commonwealth as is required of corporations of any other character. In addition, when the insurance department was established, valuation, license and other fees were required of the companies to maintain the cost of carrying on the department. Owing to the immense increase of the business, far beyond the increase in expenditures to conduct the same, these fees have not only paid the entire salaries and other expenses of the department, but have returned an everincreasing revenue to the Commonwealth, the excess during 1894 being thirty-eight thousand six hundred dollars (\$38,600). The valuation fee has been from time to time decreased, until it is now but one-fourth of one per cent. per thousand dollars of insurance, and it does not seem, in the nature of the business, to be desirable to further decrease any of the fees, but it will be admitted that as all these extra demands upon the companies were established for the sole purpose of meeting the actual expenses of the insurance department, the Commonwealth ought not, in any degree of justice, to receive more than is expended by the department for its annual cost. missioner recommends that, as a matter of entire equity to the companies, it be provided that the excess of the agents' fees over the actual cost of the department be paid back in a proportional rate to the companies contributing the same.

Section 21 of the insurance statute provides that "No oral or written misrepresentation made in the negotiation of a contract or policy of insurance, by the assured or in his behalf,

shall be deemed material or defeat or avoid the policy, or prevent its attaching, unless such misrepresentation is made with actual intent to deceive, or unless the matter misrepresented increased the risk of loss." The intent of the Legislature in this section is perfectly clear. It was to prevent a corporation from setting up a mere technical misrepresentation, which in no degree affected the risk or increased the liability of the company, as a defence after the policy shall have become due. Since the passage of the act some of the companies have put into the application a warranty by which the insured warrants each and all of the statements in the application to be true. recent decision of the superior court, which is now pending upon appeal in the supreme court, to the effect that a warranty is not such a misrepresentation as is covered by the above section, practically nullifies the entire provision contained in said section, and the same should be at once amended by inserting "warranty" therein.

Attention is called to the suggestion made in the life report of last year in relation to the necessity for legislation providing for the closing of assessment and fraternal corporations which have dwindled in such a degree as to render their further existence only a menace to the interests of the public. It was shown that altogether nearly one hundred and fifty of these corporations have a membership of less than two hundred each, and the statute at present makes no provision for the closing of their affairs. During the past year there were organized in this Commonwealth an additional thirty-five, and four of this class of corporations were admitted, making altogether nearly three hundred and fifty now transacting business in Massachusetts. No one will contend that there is room for one-half of this number to successfully compete for insurance on the lines in which they are conducted; and, in addition to providing for a method of closing the weaklings, restrictions should be thrown around the organization of such institutions so as to preclude the formation of such a large number, very generally intended for the benefit of only a few individuals.

Attention is again called to the necessity of legislation forbidding fire insurance companies from paying losses while an investigation is pending in relation to the cause of the fire.

In accordance with the provisions of law as now existing,

domestic insurance companies may appoint agents at their pleasure, these not requiring, as in the case of foreign companies, a license from the insurance department. No little confusion arises in cases of complaints against individuals for acting without authority, from the fact that under this condition of affairs the department has no knowledge as to who may be acting as agents of domestic companies, properly authorized by the same. The law should be amended to provide that domestic insurance companies shall forward to the department, for registry, the names of all agents appointed, and that no person shall be authorized to act as such agent until such registry shall have been made.

For six years prior to 1876 the salary of the insurance commissioner was five thousand dollars per year.

Comparing the year 1875, the last in which the salary was five thousand dollars, with 1894, the business of all the life insurance companies transacting business in the Commonwealth shows the following:—

			1875.	1894.
Number of policies in force,			765,422	1,790,000
Amount of same,		•	\$1,907,000	\$4,750,000,000
Receipts of department,			39,929	68,364
Surplus to State over expenditures,	٠		13,239	38,275

Fire and other insurance have increased in about the same proportion.

The actual assets of all of the companies doing insurance of various kinds in Massachusetts amounted last year to thirteen hundred millions of dollars (\$1,300,000,000), and the computations of the department in relation to all classes of insurance reached an aggregate of thirty-six thousand millions of dollars (\$36,000,000,000)

In view of the foregoing statement, and in the light of the salaries paid to similar officials in other States, it is modestly suggested that the salary of the commissioner of this Commonwealth might equitably be increased.

^{*} The charter, besides authority to transact a life insurance business, confers also authority to act as administrator, executor, etc., to transact what is known as a trust business. The relations of the two departments of the business are fixed by the provisions of the charter. The accounts are kept entirely distinct and separate. The entire surplus in the insurance department accumulates for the benefit of the policy holders. The only advantage, direct or indirect, which the stockholders can at any time have from the union of the two features of the business, results from the fact that the management of the trust business, from which they derive their profits, is done for them without charge. This includes the interest on the capital.
